

Save \$

Reduce your water and sewage bill

Turn off the Tap!

Just by turning off the tap while you brush your teeth in the morning and before bedtime, you can save as much as 4 to 8 gallons of water! That could add up to more than 200 gallons a month, enough to fill a huge fish tank that holds 6 small sharks! The same is true when you wash dishes. Turn off the tap! Scrape your dirty dishes into the trash — then put them in the dishwasher.

Shower Power!

Taking a shower uses much less water than filling up a bathtub. A shower only uses 10 to 25 gallons, while a bath takes up to 70 gallons! If you do take a bath, be sure to plug the drain right away and adjust the temperature as you fill the tub. To save even more water, keep your shower under five minutes long—try timing yourself with a clock next time you hop in.

Fix That Leak!

Fixing a toilet leak is a great way to reduce household water use and boost water conservation. If your toilet has a leak, you could be wasting about 200 gallons of water every day. That would be like flushing your toilet more than 50 times for no reason! Try this experiment: test for leaks by placing a drop of food coloring in the toilet tank. If the color shows up in the bowl without flushing, you have a leak.
